

ORDER

1375.7D

**ORGANIZATION/COST CENTER CODES
STANDARD DATA ELEMENTS**

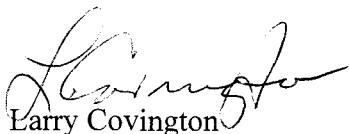

October 22, 1998

**DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION**

FOREWORD

This order prescribes procedures and provides the structure used to establish the organization/cost center code which identifies all levels of FAA organization. These codes are used in all financial, personnel, payroll, and other management data systems. This order also contains a listing of organization/cost center codes for the Washington headquarters, regions, and centers.

Larry Covington
Director of Performance Management

CHAPTER 1. GENERAL

1-1. PURPOSE. This order prescribes the structure, control, and application of organization/cost center codes within the Federal Aviation Administration (FAA). This order also contains those organization/cost center codes that are centrally controlled.

1-2. DISTRIBUTION. This order is distributed to division level and above in Washington headquarters, regions, centers, and to the Airway Facilities System Management Offices.

1-3 CANCELLATION. Order 1375.7C, Organization/Cost Center Codes Standard Data Elements, dated December 9, 1997, is canceled.

1-4. EFFECTIVE DATE. Organization/Cost Center Codes contained in this order became effective October 1, 1998.

1-5. EXPLANATION OF CHANGES. This revision:

a. Contains new and revised cost center codes and eliminates deleted cost center codes.

b. Deletes the cost center codes for the abolished Associate Administrator for Administration, (AAD) and all reporting organizations (cost center codes 9100 and 1000 series).

c. Contains newly established cost center codes for the Assistant Administrators for Financial Services (ABA), Human Resource Management (AHR), and Region and Center Operations (ARC).

d. Contains newly established cost center codes for the Free Flight Phase One Program Office (AOZ).

1-6. FUNCTION OF ORGANIZATION/COST CENTER CODES. These codes have been established as the **standard** means for identifying all levels of FAA organization, and in doing so,

provide a structure of data collection points for reporting and aggregating the agency's accounting, personnel, payroll, logistics, and other data. Generally, organization/cost center codes are not used for purposes other than the identification of organizations. Other coding schemes such as program element codes are to be used to identify functions or to meet other special needs for accumulating information.

1-7. APPLICATION. Organization/cost center codes shall be used in FAA data systems which require the identification or aggregation of information by organization. In national systems, the organization/cost center code must be used with the applicable headquarters, region, or center code since the code is not unique by itself; i.e., common organizations such as regional Air Traffic Divisions have the same codes. The codes for regions, centers, and Washington headquarters are prescribed in Order 1375.2A, Standard Data Elements and Codes--General Standards. These codes are listed in Appendix 6 Washington Headquarters, Regions, and Centers Table of Contractions and Codes.

1-8. RESPONSIBILITIES.

a. The Office of Performance Management is the office of primary responsibility for Order 1375.7, assignment and publication. In carrying out this responsibility, the office shall:

(1) Review and decide on all proposals for the assignment or change of organization/cost center codes for all organizational elements within Washington headquarters, all division-level and above elements of the regions and centers, and for all other organizational elements prescribed by the Administrator (i.e., Order 1100.2, Organization--FAA Headquarters and in Order 1100.5, FAA Organization--Field.)

(2) Publish approved organization/cost center codes covered by paragraph 1-8a(1) in the appendices of this order after appropriate coordination with affected organizations.

b. Regions and centers are responsible for:

(1) Assigning organization/cost center codes to all subordinate organizations and field elements not covered in paragraph 1-8a(1) within the prescribed structure.

(2) Publishing such assignments in region/center directives. Copies of all such directives shall be sent to the Office of Performance Management, Corporate Information Division, APF-100.

1-9. PROCEDURES.

a. Offices, services, regions, and centers needing new or revised organization/cost center codes, covered in paragraph 1-8a(1), shall request them in writing from APF-100. The request should:

(1) Specify the change requested.

(2) Explain the need for the change--ordinarily the approval of organizational change.

(3) Describe any known functional and cost impact the change will have on national or local systems.

(4) Recommend an effective date for the change.

(5) Describe the extent to which the change should be adopted in other like organizations; e.g., in all regions, Washington, and regional counterpart organizations.

b. The Office of Performance Management will:

(1) Review and notify the requesting organization in writing as to the disposition of their particular request.

(2) Reflect subsequent changes to the appropriate appendices of this order.

(3) Include new codes in this order whenever appropriate due to changes in Order 1100.2, Organization--FAA Headquarters, and in Order 1100.5, FAA Organization--Field. Appendix 1 Washington Table of Codes reflects the cost center codes regarding Order 1100.2. Appendix 2 Basic Regional Organization Table of Codes, Appendix 3 Mike Monroney Aeronautical Center, and Appendix 4 William J. Hughes Technical Center Table of Codes reflects the cost center codes regarding Order 1100.5.

10/22/98

CHAPTER 2. STRUCTURE OF ORGANIZATION/COST CENTER CODES

2-1. GENERAL. This chapter explains the structure of the organization/cost center codes for use by all offices, services, regions, and centers. Additionally, this chapter illustrates the use of these codes and indicates the meaning of each digit. Appendix 1 prescribes the codes for Washington Headquarters. Appendix 2 prescribes the codes for the regions. Appendix 3 prescribes the codes for Mike Monroney Aeronautical Center. Appendix 4 prescribes the codes for the William J. Hughes Technical Center. Appendix 5 prescribes the codes for the Aviation System Standards Program. Appendix 6 prescribes a two digit alpha contraction and one digit alpha/numeric code to be used along with the cost center code in identifying where the specific code is used; e.g., Washington headquarters, center, or region. Appendix 7 prescribes a high-level summary of the cost center code series by organization.

2-2. CODE STRUCTURE. The code structure provides for various levels of summarization by areas of responsibility above the operating organizational levels.

a. The organization/cost center codes are designed to provide sufficient flexibility to permit all offices to adopt it to include the levels of detail needed for varying information requirements and are used in conjunction with the Washington headquarters, regional, and center identification codes.

b. Structure.

(1) First Digit. The digit is used to identify broad areas of responsibility.

(a) Code 0 in this position identifies the Office of the Administrator identified by the preceding headquarters code (see appendix 6); i.e., W 0XXX refers to the

Office of the Administrator. Assistant Administrators will also use 0 because they report directly to the Administrator.

(b) Code 9 is reserved for identifying associate administrators and their immediate office and staffs (see paragraph 2-3).

(c) The other codes 1 through 8 or A through Z in the first digit are used to identify the Line of Business (LOB), e.g. airports (5), regulation and certification (B), security (F), etc.,. In the Air Traffic Services LOB these codes are also used for major components such as AAT (2) and AAF (8). Generally, the same codes are used in all organizations reporting to that LOB.

(2) Second Digit. The code identifies specific services in Washington and divisions in regions and centers.

(3) Third and Fourth Digits. These digits are used to identify:

(a) The next two levels of organization below that identified by the second digit.

(b) The specific identity and type of field element.

(4) Fifth and Sixth Digits. These digits can be used for further subdivision within an organization. These digits will only be shown in this order if they are being used by an organization.

NOTE: At this time only four digits of the cost center code are used in the personnel and payroll system (CPMIS & IPPS). The financial system (DAFIS) uses up to six digits.

2-3. ILLUSTRATIONS FOR USE.

Administrator Codes (Washington, Region, and Center Directors) will be distinguished by the number zero (0) in the first digit 0000. The second digit will also be zero to indicate organizations reporting to the administrator 0000:

Administrator and staff will use 0010. All other management levels will use 10 in the third and fourth position of the cost center code. Organizations titled Staff should use numbers **11-19** in the third and fourth position indicating they report directly to that manager. If the staff is equivalent to or function the same as a division should follow the coding guidelines for division and branch.

Deputy Administrators will use 0020.

Sample

AOA-1	0010	Administrator and staff
ADA-1	0020	
ADA-20	0025	
ADA-30	0030	
AOZ	0T00	Free Flight Phase One Program Office

(AOZ will follow the guidelines for office level and below.)

Assistant Administrator code first digit will be zero since they report directly to the Administrator the second digit will distinguish the Assistant Administrator 0X00:

Sample

AGC-1	0100	Chief Counsel
ACR-1	0200	Civil Rights
ASY-1	0300	System Safety
APA-1	0400	Public Affairs
API-1	0600	Policy, Planning and International Aviation
AGI-1	0700	Government & Industry Affairs
ABA	0C00	Financial Services
AHR	0P00	Human Resource Management
ARC	0R00	Region and Center Operations

(API, ABA, AHR, and ARC, will follow the guidelines for office level and below.)

Associate Administrator Line of Business (LOB) codes will be distinguished by the number nine (9); the second digit will distinguish the Associate Administrator LOB 9X00:

Sample

ARP	9500	Airports
AVR	9B00	Regulation and Certification
ACS	9F00	Civil Aviation Security
ARA	9G00	Research and Acquisitions
AST	9H00	Commercial Space Transportation
ATS	9Z00	Air Traffic Services

Offices reporting to an Associate Administrator the first digit of the code will be the Associate Administrator LOB code the second digit of the Office code will distinguish the Office:

Sample

ARA	9G00
ASU	G000 Office of Acquisitions
AIT	G100 Office of Information Technology
AAR	G200 Office of Aviation Research

Division or equivalent reporting to an Office first digit will be the Associate Administrator LOB code, the second digit will be the Office code, and the third digit will distinguish the Division (1 in this position is reserved for the Director and Staff):

Sample

AAR	G200 Office of Aviation Research
AAR-1	G210 Director and Staff
AAR-100	G240 Human Factors Division
AAR-200	G220 Research Division
AAR-400	G250 Airport & Aircraft Safety R&D Division

Branches or equivalent reporting to a Division first digit will be the Associate Administrator LOB code, the second digit will be the Office code, the third digit will be the Division, and the fourth digit will distinguish the Branch (branch codes should be distinguished by 1-9.):

Sample

AAR-400	G250 Airport & Aircraft Safety R&D Division
AAR-410	G251 Airport Technology R&D Branch
AAR-420	G252 Airport and Aircraft Safety R&D Branch

STRAIGHT-LINED ORGANIZATIONS:

Straight-lined organizations reporting to an Assistant Administrator will use the same code as Washington Headquarters:

Sample

AGC	0100 Chief Counsel
AAL-7	0100 Regional Chief Counsel
ACE-7	0100 Regional Chief Counsel

All other straight-lined organizations will use in the first digit the same code used by the appropriate Associate Administrator LOB with the exception of Air Traffic Service and Airway Facilities Service:

ARP-1	9 <u>5</u> 00	Associate Administrator LOB for Airports
Regions	<u>5</u> XXX	Straight-lined organizations reporting to Airports
ACS-1	9 <u>F</u> 00	Associate Administrator LOB for Civil Aviation Security
Regions	<u>F</u> XXX	Straight-lined

Region and Center organizations cost center codes created for organizations outside of the basic regional organization structure prescribed in Order 1100.5, FAA Organization--Field, are placed at the regional administrator's discretion.

Field Facilities first digit will correspond with the appropriate Associate Administrator LOB code with the exception of Air Traffic Service and Airway Facilities Service. Further breakdown of the cost center code is placed at the discretion of the straight-lined organizations.

Sample

Air Traffic Services (ATS):	9<u>Z</u>00
Air Traffic field facilities	<u>2</u> XXX
Airway Facilities field facilities	<u>8</u> XXX
Regulation & Certification (AVR):	9<u>B</u>00
Flight Standards	<u>B</u> XXX
Aircraft Certification	<u>B</u> XXX
Aviation Medical Division	<u>B</u> XXX
Civil Aviation Security (ACS):	9<u>F</u>00
Civil Aviation Security	<u>F</u> XXX
